

Innovative Solutions Through Science

Why just filter air... **Sterilize it!**

Asepsis Air™
Redefining Air Quality

Asepsis Air™ P100 UVGI System

The Asepsis Air™ P-100 is a departure from HEPA Filter technologies; engineered to provide an effective addition to your infection control strategies. It's time to re-imagine air quality in healthcare...Free from airborne pathogens; not just filtered.

- Continuously **Sterilizes** the air to eliminate airborne pathogens 24/7
- Engineered to meet today's healthcare challenges
- Mitigate risk and reduce the spread of HAI's
- Effective against airborne pathogens **below 0.3 µm range** of HEPA filtration
- Can Sterilize the air in a 12 x15 x 8 foot room in 12 minutes

Specifications:

- Delivers optimal Bacterial/Viral Kill Flux of 15,000 µw/cm²
- Variable control from 25 to 125CFM
- Independent UV-C tubes for multi-redundancy
- Operates Germicidal Wavelength 254nm
- Ozone Free
